Direct to Film

xpres DTF

Direct to film (DTF) printing is a similar process to Direct to garment (DTG) printing. The key difference is that, rather than printing directly onto garments, DTF uses water-based ink to print a film transfer. We have everything you need to take advantage of this exciting new technology!

Mimaki

XP1330 TXF150-75 DTF PRINTER

Mimaki's first DTF printer with a maximum printing width of 80 cm is packed with technology. To overcome common DTF issues of ink ejection defects and white ink clogging, Mimaki has adopted a degassing ink design that uses aluminium packs as the printer's ink packaging form.

- Eliminates "ink ejection defects" and "white ink clogging" to realize stable operation.
- ECO PASSPORT certified ink to ensure customer safety and security.

Mimaki

XP1331 TXF300-75 DTF PRINTER

TxF300-75 is a DTF printer with a maximum printing width of 80 cm for producing DTF print transfer sheets. PHT50 heat transfer pigment ink for DTF, consisting of five colors (CMYK and white), has acquired the ECO PASSPORT certification which is essential for obtaining the international safety standard for textile products OEKO-TEX®.

- Increased productivity to approx. 300% (Compared to the TXF150-75).
- Eliminates "ink ejection defects" and "white ink clogging" to realize stable operation.
- ECO PASSPORT certified ink to ensure customer safety and security.

EPSON®

SC-G6000 DTF PRINTER

Epson is proud to announce the release of its first Direct-to-Film printer, the SC-G6000, the initial offering in a new line of Epson DTF printers. The new Epson 'G' series printer represents a significant advancement in textile printing technology, enabling users to create high-quality transfers across a wide array of fabric types.

The printer mechanics, PrecisionCore printhead, ink system and image processor are the latest Epson print technologies. All are fully integrated with Epson's new user-friendly Edge Print Pro software (included).

- 900mm media width.
- New 1.6ltr UltraChrome DF ink pouches.
- Versatile and vivid prints suitable for application on a variety of fabrics.
- Fabric wiper and auto cap cleaning offer minimal user maintenance.

Roland®

XP2056 TY-300 DTF PRINTER

Elevate your printing with the next generation Roland TY-300 Direct to Film printer with outstanding print quality and performance. This DTF printer enables transfer of intricate designs while maintaining vibrancy, smooth gradations and accurate tones with its True Rich Color 3 technology.

- Ultra-fine detail & bold, vivid prints.
- High-speed performance.
- Ease of use.
- High-performance DTF inks.
- True Rich Color 3 technology.
- Built-in perforated sheet cut feature.

Roland®

XP2049 VERSASTUDIO BY-20 DTF PRINTER

Simple to use, reliable and efficient, the BY-20 makes decorating apparel and accessories with vibrant, detailed graphics quick and easy, even for those with no printing experience. Plus, with the integrated contour-cutting functionality, you can produce heat transfer graphics from PVC sheets, all on a single, affordable compact device.

**XP1359
DTF INLINE 900 PRO SHAKER CURE UNIT**

The Adkins DTF Inline 900 Pro shaker cure unit comes packed with next generation features to enable efficient high-volume roll to roll DTF production. With a 90cm max media width, innovative automatic powder recirculation and fast curing times with low power consumption for reduced energy costs, the Inline 900 Pro is designed to achieve demanding volume without compromising output quality or reliability.

- 90cm max media/curing width.
- Automatic powder recirculation for uninterrupted production and reduced powder handling.
- Powered from standard domestic plug socket (UK-13amp / EU-16amp)
- Automatic feed speed for universal & seamless printer integration (max speed 30 l/mtrs per hour).
- Built in medical grade/carbon filtration and extraction with automatic replacement reminders.

**XP1358
DTF INLINE COMPACT 900 SHAKER CURE UNIT**

The Adkins DTF Inline Compact 900 shaker cure unit enables high-volume roll to roll DTF production within it's compact space saving design. With a 90cm max media width, automatic operating mode, and fast curing times with low power consumption for reduced energy costs, the Compact 900 is designed to achieve demanding volume without compromising output quality or reliability.

- 90cm max media feed and cure width.
- Powered from standard domestic plug socket (UK-13amp / EU-16amp).
- Compact space saving design to easily fit in most production environments.
- Built in medical grade/carbon filtration and extraction with automatic replacement reminders.
- Automatic feed speed for universal & seamless printer integration.

**XP1355
DTF PRO CURE OVEN**

The Adkins DTF Pro Cure Oven is the perfect versatile solution for curing direct-to-film prints with roll to roll and sheet fed production. With its large reciprocating trays, automatic operating mode, compact design and fast curing times, the DTF Pro Cure Oven is designed to meet your production demands without compromising quality or reliability.

- Two large 62x42cm reciprocating trays.
- Ideal for both DTF sheet fed and DTF roll printer users.
- Versatile efficient production using automatic operating mode.
- Built in medical grade filtration for cleaner operating environment.

**XP1356
DTF INLINE COMPACT 600 SHAKER CURE UNIT**

The Adkins DTF Inline Compact 600 shaker cure unit enables high-volume roll to roll DTF production within it's compact space saving design.

With a 60cm max media width, automatic operating mode, cost saving low operating power and fast curing times, the Compact 600 is designed to meet your production demand without compromising quality or reliability.

- 60cm max media width in compact space saving design.
- Low operating power consumption using domestic plug.
- Versatile efficient production using automatic feed speed detection.
- Built in medical grade filtration for cleaner operating environment.

DTF Consumables

Developed and extensively tested to provide optimum results every time. Available in both hot and cold peel options for any DTF printer.

Perfect for high-volume printing, offering a smooth and fast transfer process with immediate peel capabilities. Ideal for businesses with larger production needs.

Pack of 100 film sheets available in 3 different sizes from Kodak designed to suit all DTF solutions.

4 Different size options for film rolls from Kodak designed to suit all DTF solutions.

Direct to Garment

All of our Epson® DTG printers are also suitable for DTF printing

Direct To Garment is a process of printing straight onto textiles and garments using specialised technology.

Xpres cover every aspect of DTG production, from pre-treatment to finishing. The Epson SC-F2200 and SC-F3000 are our fully-featured DTG printing solutions that provide everything you need to produce garments quickly, easily and competitively.

We also stock a variety of DTG specific heat presses. Designed to ensure fixation of inks to garments after printing in order to provide excellent colour fastness when washed.

EPSON®

XP2763 SC-F3000 DTG PRINTER

The SC-F3000 is an industrial level DTF printer that's designed for high volume. This production level printer has incredibly low running costs while speedily delivering high volume, top of the range quality.

- Superb print speeds delivering up to 60 full platen dark t-shirt prints per hour.
- High capacity bulk feed ink solution.
- As low as 9p per ml on both colour and white inks.
- Ensure consistent up-time with a choice of CoverPlus service plans which include user replaceable heads.
- Auto platen gap adjustment.

EPSON®

XP2709 SC-F2200 HYBRID DTG & DTF PRINTER

The Epson SC-F2200 offers a hybrid DTG & DTF solution, including printer, printhead, inks and software.

The SC-F2200 Hybrid printer has been developed for businesses demanding accuracy, speed, and the ability to produce customers' complex designs on a variety of garments. The compact, flat top design minimises working space allowing easy installation into smaller spaces and scalability with multiple units.

SCHULZE

XP7366 PRETREATMAKER 5

The smart way to pretreat textiles. The 5-nozzle setup of the PRETREATmaker 5 enables a potential pretreat saving of up to 30% compared to a system with a 4-nozzle setup.

Epson Bundles

Looking for the perfect solution to deliver high-quality, personalised prints on a range of fabrics? Our Epson DTG/DTF bundles are here to help you transform your business with cutting-edge technology and exceptional print results.

EPSON F2200 BUNDLE WITH PRO CURE OVEN

- SureColor SC-F2200 hybrid printer.
- DTF Pro cure oven.
- Xpres DTF Evolution film A3 x 100 sheets.
- Xpres DTF Evolution hotmelt powder 1kg.

Made in Austria

aeoon have made it their business to develop the world's fastest, most sophisticated and most durable digital textile printers. Since the beginning, their customers have always been the focus of their technological development. All of their printers are manufactured with care, dedication and precision in Austria. Visit xpres.co.uk to see the full range.

COME AND SEE IT IN OUR SHOWROOM

KYO LINK DTG PRINTER

The Kyo Link Series is for companies that aim to work with the most technologically advanced DTG printers on the market and we're delighted to have a demo unit in our customer showroom.

It connects complex front-end interfaces with demanding back-end processes, can be linked with a wide variety of applications and uses the most modern RIP software. The Kyo Link Series allows effortless connections to a homepage, online shop and API interfaces. Further highlights are an integrated projector, scanner and heat press with which R2P materials can be pre-pressed. Of course, in addition to the smooth human-machine interaction, as with all aeoon printers, you achieve unrivalled production capacities with the highest quality print results.

The Kyo Link Series is therefore the most suitable printer for companies with high production volumes and automation requirements.

For full details and latest prices visit xpres.co.uk

PTB PRE-TREAT UNIT

High-speed pre-treatment for industrial mass production.

- Individual spraying areas with up to 13 nozzles.
- Laser automatically identifies areas for pre-treatment.
- Cleaning function of the nozzles and the conveyor belt.
- Save your own pre-treatment settings.
- Fluid change at the push of a button.
- Can be connected directly to a dryer (optional).

COMPACT DTG PRINTER

For versatile digital print production.

- Low capital expenditure enables entry into digital textile printing.
- No pre-treatment for white garments - low printing costs.
- Industrial print heads - print resolution from 600-2400 dpi.
- Integrated OPC-UA interface.
- Wide range of pallets - also for special applications.
- Max. print size 120 x 80cm; (47 x 31") - frameless pallet.
- Smaller footprint.

KYO DTG PRINTER

High output and high-performance industrial DTG printing.

- Fastest return on investment (with good capacity utilisation).
- Fastest DTG printer on the market.
- 24/7 - High-performance production in shift operation.
- No pretreatment for white garments - low printing costs.
- Industrial print heads - print resolution from 600 - 2400 dpi.

KYO HYBRID DTG PRINTER

For the best of DTG and screen printing combined.

- Screen printing and digital printing at the same time.
- KTS - KyoToScreen.
- App for screen setting (tablet).
- Screen adjustment up to 0.001 mm possible.
- Save and recall screen printing settings easily via our in-house app.
- Industrial print heads with a print resolution from 600 dpi up to 2400 dpi.
- Integrated OPC-UA interface.

Desktop Cutters

Automated machines designed to cut a range of digital media with speed and precision.

Roland®

**XP1984-2
GS2-24 DESKTOP VINYL CUTTER**

Compact, powerful and easy to use, the GS2-24 desktop cutting plotter is perfect for starting your graphics business or bringing graphics production in-house.

- Intuitive and user-friendly operation.
- Increased power to easily cut hundreds of materials.
- Fast and accurate cut performance.
- Built to fit into your workflow.

Mimaki

**XP1809
CG-60AR CUTTER**

The new CG-AR series builds upon the strong heritage of its predecessor and comes with new intuitive features and enhanced specifications. With the unique ID-Cut function, higher downforce, and improved accuracy, it offers reliable and precise cutting while working seamlessly with Mimaki printers.

Mimaki

**XP1808
CG-130AR CUTTER**

This entry-model of cutting plotter comes with improved cutting performance, compatibility with a wide range of cutting materials and enhanced usability, all at an affordable price.

In addition to cutting letters, labels, and stickers, the CG-AR newly supports full cutting and folding lines of cardboards. It can also produce packages up to A3 size by using dedicated options.

Desktop Print and Cut

Vinyl printers that combine to become print & cut machines.

Roland®

ChromaLuxe®

Bring your photographs and artwork to life with ChromaLuxe® - the world's leading brand of high definition sublimation panels.

Through the sublimation process, images are infused directly from sublimation paper onto specially coated sheets of metal, wood and table top photo panels with exceptional quality and resolution. ChromaLuxe® panels have been designed to offer superior fade resistance so you can be confident your treasured prints will last for generations.

Why not combine several panels to create stunning wall displays for any room. You will require a sublimation printer along with a heat press to apply your image to ChromaLuxe®. Xpres stock the largest range of heat presses in the UK, so book a demonstration now and let one of our experts show you how it's done!

Heat Presses

We've got the UK's largest selection of heat presses, for all applications and processes.

Adkins are manufacturers of heat presses and fusing machines that can be used to heat apply transfers onto a variety of surfaces.

Perfect for personalisation, the range of Adkins heat presses covers many popular areas of garment decoration and sublimation.

**XP7006A
BETA SWING PRESS**

Our best selling Swing Press offers easy access to the platen as the head swings completely clear.

- Digital electronic timer and temperature control.
- Sensitive and consistent heat control.
- Quick release interchangeable platens.

**XP7007X
BETA MAJOR PNEUMATIC PRESS
20 x 15"**

The Pneumatic Press is perfect for high volume users with automatic press and release.

- Digital electronic timer and temperature control.
- Power supply - 10.5A/2500w.
- Interchangeable platen.

**XP7019S
STUDIO POCKET/CAP
PRESS COMBO**

The Pocket/Cap Press allows you to easily apply transfers to caps, pockets, sleeves and bags. Comes complete with cap and pocket heads and platens.

**XP7033
STUDIO MUG PRESS**

Enables you to press sublimation transfers onto sublimation mugs. The heating element is interchangeable with the smaller porcelain element (available separately) which allows you to also press our sublimation porcelain mugs and sublimation water bottles.

- Digital electronic timer and temperature control.

**XP7022
BETA MAXI A2 PRESS
42 x 61cm**

A high quality technologically advanced low cost manual press, ideal for most users. The swing head operation gives a perfect view of the transfer and garment allowing accurate and easy application, along with safety of operation.

**XP7031
STUDIO CLAM PRESS 38 x 38cm**

The Clam Press is an excellent solution to customers where worktop space is at a premium.

- Digital electronic timer and temperature control.
- Consistent heat control.
- Clam action.

**XP7043
STUDIO MULTI MUG PRESS**

The Studio Multi mug press is made for quick and easy use and is ideal for medium production, printing images onto different shaped mugs.

**XP7038
STUDIO TWIN HEAD MUG PRESS**

The Twin Head mug press enables you to press transfers onto sublimation mugs. The heating elements are interchangeable with smaller porcelain elements (available separately).

- Twin independent digital electronic timers and temperature control.
- Consistent and accurate heat control.

**XP7049
BETA MAXI MULTIPLEX PRESS**

This machine has a high pressing bed and offers the capability to press plaques. Supplied with one 20 x 15" low platen as standard. Additional platens are special order items.

**XP7076
STUDIO AUTO CLAM PRESS 50x40CM**

The perfect solution for customers entering the sign and transfer market for the first time and who work in a fast-paced environment. It's quick and easy to use and requires minimum operating space and features an auto open function which is ideal in busy environments where you may be required to move away from the press during operation.

Heat Presses

Our inflation-busting, entry level price HPD presses are perfect for any start-up business. Decorate garments, mugs, bags and more with your favourite phrases and artwork using these handy presses.

XP7617
XPRES HPD MANUAL MUG PRESS

This entry level, manually operated HPD mug press is ideal for printing onto polyester coated mugs, water bottles and money banks.

XP7615
XPRES HPD SINGLE TABLE PNEUMATIC 40 x 60cm

This single table pneumatic action HPD heat press requires minimum operating space and is perfect for t-shirt printing and creating a variety of designs onto t-shirts, polo shirts, school wear, bags, mouse mats and any sublimation products that a flat press can accommodate.

XP7621
XPRES HPD TUMBLER MUG PRESS

Our HPD mug press offers amazing opportunities to print on water bottles, tumblers and mugs.

XP7611
XPRES HPD A4 PRESS 23 x 33cm

This compact HPD heat press offers a working area of 23 x 33cm and is the perfect solution for entry into sublimation printing, garment decoration and other heat transfer applications.

XP7619
XPRES HPD 2 STATION MUG PRESS

The Studio Twin HPD mug press is manufactured to an extremely high quality and is a highly-advanced mug press that has two independently controlled heating elements that can be used to apply transfers to most types of mugs and much more.

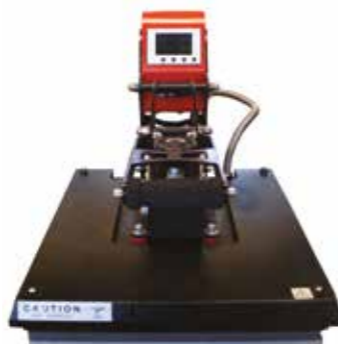

XP7600
XPRES HPD AUTO CLAM PRESS 38 X 38CM

This high quality auto open clam style HPD heat press offers an excellent space saving design and is ideal for locations with limited space, as it typically fits on a standard depth workbench.

XP7620
XPRES HPD 4 IN 1 MUG PRESS

Our 4-in-1 Multifunctional HPD mug press machine will help you to create personalised mugs, whether it's for a professional occasion such as a corporate marketing campaign or whether it's for a personal occasion – you will be amazed by the endless opportunities this automatic heat press machine will help you to maximise by printing fantastic images onto ceramics.

XP7606
XPRES HPD MASTER AUTO CLAM 50 PRESS

This high quality auto open clam style HPD heat press offers an excellent space saving design and is ideal for locations with limited space, as it typically fits on a standard depth workbench. The auto open function is excellent for busy working environments as the press will automatically pop open once the countdown timer reaches zero.

Renowned for solid build quality and with fully programmable automation, Sefa heat transfer systems maximise production levels without compromising on quality. Sefa heat presses are the only heat press manufacturer to receive ChromaLuxe approved status.

XP7327
ROTEX LITE SWING AUTO OPEN PRESS

User friendly with a robust frame. This press has optimal heat and pressure distribution making it the perfect press for small to medium volume users. Platen size : 40 x 50cm.

XP7321
DUPLUX PRO FULL AUTO PNEUMATIC PRESS

Equipped with ample space between, behind and under the plates for greater manoeuvrability. Delivers very high pressure and is valid for all kinds of transfers.

XP7317
ROTEX AIR PRO AUTO OPEN SWING PNEUMATIC PRESS

The rotex air pro V3 is perfect for medium-volume flex and screen transfer applications, sublimating on textiles and rigid substrates, DTG, and laser printing, all with outstanding user comfort.

XP7319
ROTEX PRO AUTO OPEN SWING PRESS

The high-power heating, sturdy frame and auto-swing function make the ROTEX PRO V3 the premier choice for multiple marking requirements such as medium-volume flex and screen transfer applications.

XP7300
ROTEX PRO AUTO-OPEN PRESS

A well built, robust heat press with perfect pressure and heat distribution across the plate. The draw plate press is ideal for medium production runs.

XP7324
ROTEX PRO AUTO-OPEN PRESS

The perfect heat press for balls, caps, logos and shoes. The press has a quick and tool free change process of elements.

 Designed for printing textiles and flexible polyester substrates with water-based dye sublimation inks.

XP5587 Heavy 110gsm 24" x 35m roll (2" core).
XP5520 Heavy 110gsm 24" x 85m Roll.
XP5521 Heavy 110gsm 44" x 85m Roll.
XP5522 Heavy 110gsm 64" x 120m Roll.
 Universal, multi-purpose media, designed for printing both hard substrates and polyester textiles with dye sublimation inks.

Choose TexPrint®XPHR for a simpler way of getting things done. This multi- purpose product means there is no longer a need to use different papers and profiles for different applications.

This paper is renowned for imaging signs, banners, trade show exhibits, gaming felt, athletic wear as well as ceramics, metals and glass and is still the only 'hybrid' paper that can be used successfully for both hard and soft substrates. Tested and proven with all major brands of digital sublimation inks including: Sawgrass, J-teck, Sensient, Manoukian, Inktech, Kian and OEM brands.

It is also fully compatible with Piezo print head technology on all popular large format dye sublimation printers, including: Epson, Mimaki, Roland and Mutoh.

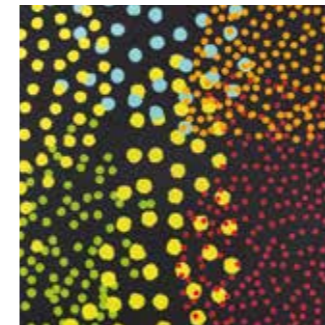

XP5500 TexPrint XPHR 105 24" x 84m (3" core).

XP5501 TexPrint XPHR 105 44" x 84m (3" core).

XP5503 TexPrint XPHR 105 64" x 120m (3" core).
